SUMMARY

Software engineer with a Computer Engineering degree and hands-on experience building ERP, EMR, and education platforms for the Nigerian SME and healthcare markets. Specialise in full-stack delivery with Laravel, NestJS, and React, with a focus on multi-tenant systems, role-based access control, and modernising legacy codebases.

PROFESSIONAL EXPERIENCE

Software Engineer — Cavidel Ltd

Dec 2024 – Present

- Build and maintain features across ERP and EMR (electronic medical records) software used by 9 clinics.
- Led a team of 3 engineers delivering the Business Health Checker (BHC), a multi-tenant SME loan-readiness platform.
- Refactored legacy modules using modern frameworks, improving performance on key workflows and bringing the codebase up to current standards.

Backend Developer (Contract) — Mattobell Ltd

Mar 2025 – Present

- Build backend services for Simpool, an ERP product for the SME sector, using NestJS.
- Develop and test features and modules, with automated tests covering core functionality.

Backend Developer (Contract) — Dellyman Nigeria Ltd

Mar 2025 – Sep 2025

- Migrated a legacy PHP codebase to Laravel, modernising the architecture and improving maintainability.
- Built REST API endpoints and wrote tests verifying endpoint functionality.

PROJECTS

Business Health Checker (BHC) — Cavidel Ltd

Multi-tenant survey platform that assesses the loan readiness of SMEs. Built role-based access control, customisable dashboards, data collection and aggregation, separate authentication per user type, and 2FA. (Stack: Laravel, SQL Server)

Brookstone Schools Portal — Brookstone Schools

Application portal, CMS, and page builder spanning primary, secondary, and foundation schools. Built with a Laravel backend and React via Inertia, featuring RBAC, application management, and events and news management systems, plus a CMS for building and editing pages. Fully responsive across admin portal, application portal, and public sites.

Street News (CMS) — JafoFinance

CMS platform for a local news/blog site with RBAC, a dashboard, and view-tracking analytics. Features category and news management, a support ticketing system, contact-form tracking, and newsletter subscriptions. Fully responsive.

CERTIFICATIONS

Google AI Essentials — Google

2025

SKILLS

Languages: JavaScript, TypeScript, Python, PHP

Frontend: React, React Native, Next.js, HTML, CSS, Tailwind

Backend: Laravel, NestJS, Node.js

Databases & Tooling: PostgreSQL, MySQL, SQL Server, Git / GitHub

Concepts: Multi-tenant architecture, RBAC, REST APIs, automated testing

EDUCATION

B.Sc. Computer Engineering — University of Ghana

Graduated 2024

Relevant coursework: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Web Architecture, Database Systems, Software Engineering, Programming Language Fundamentals, Discrete Mathematics, Introduction to Data Science.
